Dear Sir or Madam:

I just think that government intervention is getting ridiculous. People got along fine with smoking for years and years. Our fathers and grandfathers all smoked and they lived to ripe old ages. Nobody said that we would live to be 150 years old. There are a lot of other things that you could be concerning yourselves with instead of worrying about us smokers. I do not believe that smoking has anything to do with cancer.

Cordially,

Leon H Brankis
